

# Connecting with Retailers

## WHAT MAKES BPoS DIFFERENT?

First is our Generic API allowing easy integration with your existing back office systems.

BPoS is continually evolving, reflecting the needs of our end users.

Through our store controller tool which is a part of the BPoS licence, BPoS can be fine tuned by the end user and can be easily accessed by highly trained dealers if a user needs help.

Take this a step further and the adoption of the group controller tool allows our users to have up to the minute dashboard reporting across your whole estate of stores.

## BPoS Till Software

- BPoS till software reflects the needs of today's retailers in terms of functionality, deployment, technology and integration
- Accredited dealers ensure quality service, with extensive back up through the dealer and distribution network
- A scalable solution, cost effective to develop and proven in the most demanding of retail environments
- BPoS is affordable for any business, is not hardware specific and is built using Microsoft technology

# Connecting with Retailers

## Why choose BPoS till software?

### TECHNICAL SUPPORT

Our dealer network is highly trained and is always ready to help you with any assistance you may require

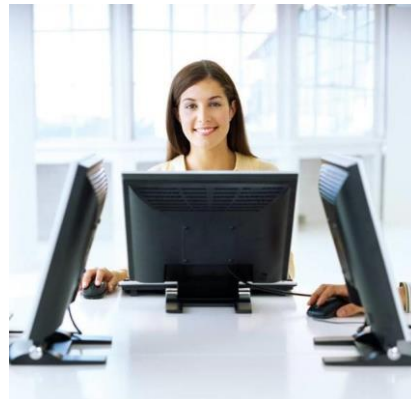

### PARTNERSHIPS

Partnerships are vital to the success of our business and the continued growth and development of the BPoS product. Check out our website for more details of our partners and the roles they play

### BESPOKE SOLUTIONS

Bespoke development is a major part of our success. This can be carried out by us or by one of our accredited partners

To arrange a demonstration or for more information on any of our products or services please visit us at [www.bposretail.com](http://www.bposretail.com) or call on 01244 573210 and we will direct you to your local dealer

BPoS was developed in response to retailers asking for a powerful and flexible Epos system that was free from being tied to a specific back office or inventory package.

With our generic API toolset and first class technical back-up, BPoS has carved a strong position in today's EPOS supply chain.

Repeat business and innovation help us to thrive.

Our partners in the distribution and dealer network understand the need for this solution. They know that with our professional team backing them up, any retailer adopting BPoS can be confident of a resilient solution and speedy return on investment.

**Consultancy** services are a key element for many of our clients large and small. The BPoS team have been deploying retail systems for over 25 years and it is this experience that marks our software development and consultancy teams out from many others in the marketplace. Often used as a knowledge base we will be pleased to spend time assisting our dealers when discussing strategy, functionality, cost, project management and deployment matters until a project is ready to progress.

## Services Available
